QRT REPORT FOR THE PERIOD FROM 2011-12 TO 2018-19
(As per the terms of reference of the QRT Committee)

KVK Poonch

1. GENERAL INFORMATION ABOUT KVK

i	Name of KVK/District and state	Krishi Vigyan Kendra Poonch, District: Poonch, UT of Jammu & Kashmir
ii	Host organization Name and Address with email ID and Fax and phone numbers	Sher-e-Kashmir University of Agricultural Sciences & Technology of Jammu, Main Campus Chatha, Jammu (J&K), Email ID: deeskuastj@gmail.com , Phone No. 0191-221796, Fax: 0191-221796
iii	Name of the Director and official contact phone number(s)	Dr K S RISAM 9419210023
iv	ICAR sanction order no. with date	2(54)/2003-AE.11 dated 30.03.2007
iv	MOU number with date (Date/month and year of start)	
v	Address of KVK with phone number, fax, number and e-mail ID	KVK Poonch, Qazi Morah, Poonch, UT of Jammu & Kashmir. Phone No. 01965-221796, Fax: 01965-221796 Email ID: kvkpoonch@gmail.com
vi	Name of Chairman and contact number	
Vii	Name of Senior Scientist and Head of KVK and contact number	Dr. Ajay Gupta Phone No. 9469170031, 7889834416

2. VISION, MISSION, MANDATE AND ACTIVITIES OF KVK

(i) Vision

Science and technology-led growth leading to enhanced productivity, profitability and sustainability of agriculture.

(ii) Mission

Farmer-centric growth in agriculture and allied sectors through application of appropriate technologies in specific agro-ecosystem perspective.

(iii) Mandate

Technology Assessment and Demonstration for its Application and Capacity Development.

(iv) Activities

- On-farm testing to assess the location specificity of agricultural technologies under various farming systems.
- Organize Frontline Demonstrations to establish production potential of technologies on the farmers' fields.
- Capacity development of farmers and extension personnel to update their knowledge and skills on modern agricultural technologies.
- To work as knowledge and resource centre of agricultural technologies for supporting initiatives of public, private and voluntary sector in improving the agricultural economy of the district.
- Provide farm advisories using ICT and other media means on varied subjects of interest of farmers

6. TO EVALUATE THE INNOVATIVE EXTENSION METHODOLOGY DEVELOPED AND THE PROCEDURES ADOPTED BY THE KVKS TO PRIORITIZE, MONITOR AND ASSESS THE IMPACT OF PROGRAMMES

6.1 Innovative extension methodology developed and promoted by KVK

[illegible]

6.2 Impact of programmes: Case studies/Success stories/others

Year	Title	Success story in brief
2008 to 2019	Hybrid maize brings prosperity to Farmers of Poonch	Maize is the most important crop in Poonch district. With the release of commercial hybrids in maize, there is tremendous increase in maize production in India. Krishi Vigyan Kendra therefore felt an urgent need to promote single cross maize hybrids to increase the maize production and productivity of district Poonch. Evaluation trials were also conducted on the experimental farm of Krishi Vigyan Kendra and farmers field to show relative advantage of hybrids over traditional varieties. However, before introducing the hybrids in the district, some hard working and progressive farmers were selected for laying the Front Line Demonstrations (FLDs) so that more number of farmers can be convinced. More than 650 Front Line Demonstrations were conducted on the farmers' field during <i>kharif</i> 2011 to <i>kharif</i> 2018 in the district under ISOPOM and KVK trials (Fig. 1 and Fig 2). The performance of hybrids was excellent with grain yield ranging from 45-60 qtls/ha. The area under hybrid maize has increased over the years. Seed demand and area under maize hybrids has increased significantly during last 3 years. The overall area under hybrids is to the extent of 85 % of total area under maize in the district.
2010-2014	Seed Replacement Rate of Wheat (<i>Triticum aestivum</i> L.)-SRRW by HYW variety HS-490	Wheat is a main crop during Rabi season and is staple food of most of the people. In Poonch, More than 50% of land remains uncultivated due to extreme cold and unavailability of early/medium maturing varieties of Wheat. Some of the farmers were growing awn less wheat varieties for fodder purpose only. KVK introduced first time in Rabi 2010 a high yielding wheat variety HS-490 produced by IARI Regional Research Wheat Station, Shimla. The seed was procured from IARI Regional Station Karnal. FLDs were conducted on the farmer's field during Rabi 2010 in district Poonch. The performance of wheat variety was excellent and produced yield from 30-35qtl / ha. The variety covered more than 400 hectares area in the year 2014-15. Therefore this variety has great boom in the Haveli tehsil of District Poonch and is horizontally

		expanding more and more area due to its high yield, resistance against yellow rust and early maturity and being very well suited in Paddy / Maize-wheat cropping systems in this hill district of J & K. It is immense accomplishment of the Krishi Vigyan Kendra, Poonch since its establishment.
2010 to 2018-19	Security of Fodder through Introduction of Oat (<i>Avena sativa</i> L.) Varieties Kent and Sabzar	there is scarcity of fodder in these areas and are urgent need of introduction of some Rabi fodder crops. Average land holding in the district is very small to meet the fodder requirement and the availability of grasslands and pasturelands has decreased over years due to increasing human population and new roads and construction works. As a result, Fodder is sold sometimes costlier than the grain crop. KVK Poonch introduced and popularized the rabi season fodder in Poonch district. As a result, the problem of fodder during lean months has been reduced to a significant extent in Poonch district. The demand of Oats seed has increased from less than 100 quintals in 2010 to more than 2000 quintals in the year 2018-19 which shows the impact of the spread of technology.
2014-2019	Napier growing for achieving self-reliance in fodder	Animal Husbandry is a major enterprise and provides livelihood to nomadic and migratory families who have large number of milching animals besides sheep and goats. Farmers have small land holdings and availability of arable land for fodder cultivation is limited. There are areas on dhoks, along the bunds, weed infested areas, waste lands, fallow lands where Napier grass can grow well. Napier also known as elephant grass is a popular fodder crop. It is a fast growing, deeply rooted, perennial grass growing up to 4 meters tall. It grows well in high rainfall areas and can survive well from amsl upto 2000m. KVK Poonch introduced 02 napier hybrids in Poonch districts in the year 2012 and after evaluation at KVK Farm, front line demonstrations on Napier Hybrid (NB37) are laid out by KVK Poonch every year. The napier root slips were grown in waste lands and dhoks from the month of July at a spacing of 75 cm X 50 cm. The grass performed well in all the demonstrations. More than 500 farmers have been provided rooted slips of napier slips to overcome the problem of fodder
	Protected Cultivation of vegetables in	KVK-Poonch has raised High tech polyhouse in the campus to demonstrate protected

	Poonch:	cultivation of vegetables, where offseason vegetables like tomatoes and cucumber were successfully raised, due to which the area under protected cultivation has increased many folds in district poonch.																				
2016-17	Introduction of low chilling and High Density Planting cultivars of apple in Poonch:	KVK Poonch provided technical support to the orchardist time to time for adopting low chilling cultivars of apple suitable for HDP, scientific techniques viz.Integrated Nutrient Management (INM), Canopy Management (Training & pruning), and pollination management in their orchards. The orchardist of the mandi area became the source of inspiration for other orchardists and 08 more orchardists of the area have planted the high density planting (HDP) orchards of apple under scientific lines at their farm thereby increasing their annual income besides providing employment round the year. 2017-18	Mushroom cultivation as a profitable entrepreneurship for the farmers of District Poonch:	Krishi Vigyan Kendra conducted vocational programmes on mushroom production for interested farmers for the duration of one month in which complete mushroom cultivation techniques demonstrated. Farmers were given practical training on compost making, spawning, spawn running, casing, and harvesting techniques. Farmers were also given live training in the demonstration unit of KVK Poonch. After the completion of training, Scientists also provided technical knowhow for establishment of mushroom unit one of the progressive farmer namely S. Amreek Singh of village Jhullas started a low cost mushroom production unit and in the first year of establishment, he obtained a profit of about 40,000 from selling of mushroom. Now he is earning a profit of more than 1.5 lakhs from mushroom production from a low cost mushroom production unit.																				
2017-18	Adoption of Rajmash cultivar BR-104 in area of Loran (Poonch):	The traditional rajmash variety (local loran) has a yield potential of 3.25 quintals per hectare in mixed cropping. However, introduction of a promising variety (BR-104) which gives the yield of 4 quintals per hectare under mixed cropping. Moreover, this variety has typical aroma and taste and is preferred for consumption by the people of J&K.
